

GRANDMA'S EVIDENCE

From Vault of Death

First broadcast 23 Dec 1965

Grandma states:

"It seems I remember when I was a little girl my grandma told me about the old London subway. Trains under the ground – New York had them as well. Of course that was before this new-fangled overhead monorail system"

Jeff is in his mid-fifties, so presumably Grandma would be 75-85. If she was born c.1940-1950, why didn't she know about the subways in New York/London? If however, she was not born until 1980-1990, then a viewer in 1965 could well suppose that by then monorails had replaced the Underground.
